

Advanced Tracker Technologies Inc.

Labour Standards British Columbia

Overview

This module takes effect during calculations.

Once installed and active, Employee Tracker will allocate time worked on a holiday depending on employee's eligibility. An eligible employee is one who has been employed for 30 calendar days prior to the holiday, and has earned wages on 15 of the 30 days immediately preceding the holiday.

An eligible employee will follow the "Holiday" time distribution portion of a time calculation rule for time worked on a statutory holiday.

An in-eligible employee will follow the standard daily overtime distribution portion of a time calculation rule for time worked on a statutory holiday.

Setup

Under the menu Utilities->Labour Standards – British Columbia, we have the opportunity to make this add-in for Employee Tracker either active or in-active.

If activated, a simplified representation of the employee specification buckets becomes enabled, allowing for a filter to be constructed. This filter specifies which employees within the database are to be affected.
