

Labor and Job Costing Management by Design

Improving
The Way To
Manage Your
Workforce

Shop Tracker

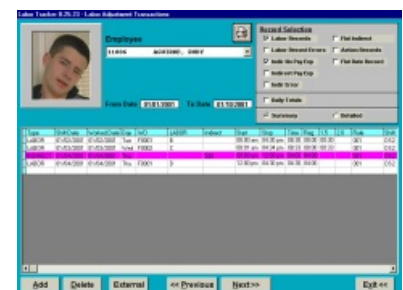

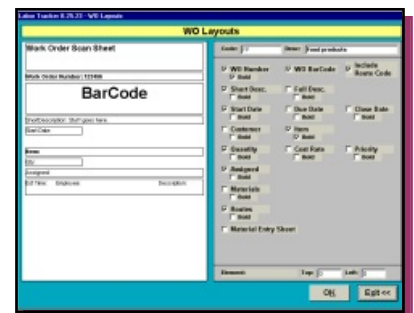

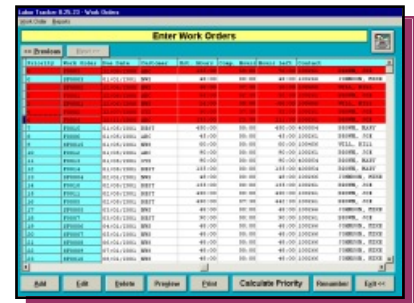

Shop Tracker is a must for any business that wants to eliminate costly and redundant manual methods of collecting, calculating and reporting on job based labor activities.

This *Tracker* system:

- greatly reduce paperwork
- streamline job orders
- have instant labor cost and performance information
- save thousands of dollars on data entry functions
- improve accuracy of reporting on jobs.

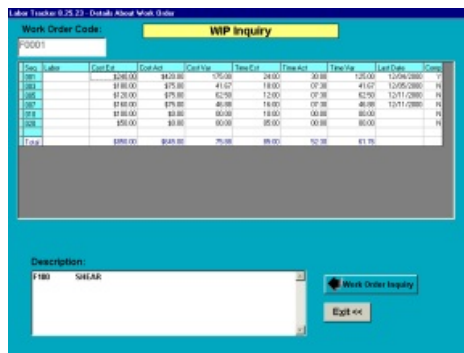

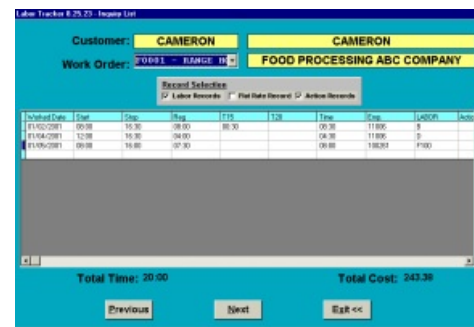

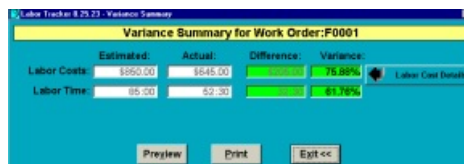

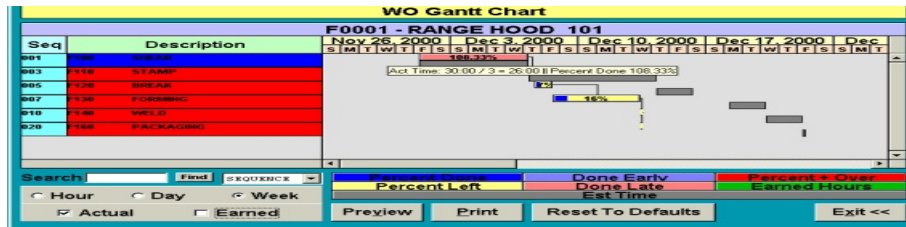

Shop Tracker reporting is rich with real time data. Analyze and sort your labor information by:

- Employee
- Work Order
- Customer
- Item
- Direct Labor
- Indirect Labor
- Employee Efficiencies
- Scrap Analysis
- Work Order Schedules
- Work Order Priorities
- Material Cost Analysis
- Action Code Analysis

Shop Tracker

Shop Tracker gives you a variety of ways to view your work order activity. Better understanding of your work orders will save time and money!
